CSE 518A: Project Milestone 1

Due: March 7 (Thursday), 2019

Notes:

- Please submit the proposal using Gradescope. Each team only needs to submit one proposal. Check the following link on how to submit group assignments on Gradescope. Make sure you follow the instructions and assign team members correctly.
  `https://www.youtube.com/watch?v=a6DERS94qPY&feature=youtu.be&t=32s`

- The proposal is due **by 11:59 PM on the due date.** Remember that **no late submissions will be accepted** for reports related to course projects (including proposals, milestone reports, and project reports).

Requirement:

In the report for milestone 1, please include the following:

- *Brief literature survey*: Find at least 2 to 3 papers. In one to two paragraphs, summarize what they are doing and explain the connection to your project.

- *Project plan*: Please also describe your project plan, including

  - A description of what you hope to achieve for this project. If possible, include the criteria that you can use to evaluate whether you achieve your goal in the end of the semester.

    For theoretical/simulation projects, please also try to write down your user models. In particular, what are the assumptions you are going to make? For application projects, try to identify what components you need to implement. For experimental projects, try to have a first version of your experimental design.

  - Give a timeline on what you plan to do about the project for the rest of the semester.

Project Timeline:

If there are any changes, they will be announced in class.

- Mar 7: Milestone 1

  - Literature review and the description of your plan (around 1 to 2 pages).
  - Last chance to change the topic.

- Apr 9: Milestone 2

  - Summary of your current progress (up to 2 pages).

- Last chance to convert the research project to a (more extensive) literature review.

- Apr 23/25: In-class Project Presentations.

- Apr 28: Project Final Report (up to 6 pages).
